F-500

Large Volume Thermal Fog Generator

Specifications

Insecticide Output:	30 to 35 gallons of oil based formulation per hour.
Fog Type:	Flameless, low-temperature, dry fog.
Fog Particle Size:	Adjustable from 0.5 to 30 microns.
Engine:	Kohler commercial heavy duty engine. Twin cylinder, 4-cycle.
Horsepower:	18 H.P. OHV Kohler Command, 624 cc disp., pressurized oil system with spin on oil filter
Drive:	Direct. Rotor disc mounted directly on engine crankshaft.
Fuel:	Regular gasoline.
Fuel Tank Capacity:	3.0 gallons
Starter:	Electric start from remote cab control, with choke.
Generator:	Alternator, 12-volt.
Weight Empty:	237 pounds, 107 Kilos
Machine Dimensions:	L 31" x W 29" x H 24"
Shipping Dimensions:	L 36" x W 30" x H 26"

The Model F-500 has been completely re-designed and updated. The F-500 will perform exactly the same, discharging a large volume of Fog that lays and stays to kill mosquitoes. With over 10 improvements, this thermal fogger is ready to exceed expectations and make fogging much easier, safer, and more productive. Equipped with a more powerful 18 HP gasoline engine, this unit runs longer, and with less heat and maintenance than standard "pulse jet engine" foggers. There are no belts, couplers, or transmissions. Service is simple, and intervals are increased with the new overhead valve engine. The new 3 gallon gasoline tank doubles running time versus the previous model.

The F-500 can be ordered STANDARD with end user supplying their own formulation drum, or with an OPTIONAL steel mounting frame and 55 gallon drum supplied with the fogger installed from the factory. Also available with an optional 1 year, or two year spare parts kit.

The large volume of fog from the F-500 will surely put your community on notice that your health department is serious about controlling mosquitoes. This new F-500 is now emissions and CARB compliant in 50 states.

New features for the F-500:

18 HP Kohler OHV engine, complete with special specification electric choke solenoid, and idle down solenoid

New Pistol Grip Cab Control which operates 100% of machine all functions from the cab of the vehicle, with temperature indicator to assist operators

Digital Thermometer with remote bright digital readout, and "HA" or High Alarm blinking Indicator

New THREE stage pre heat device with primary spinning disc pre heat, secondary pre heat chamber, and final injection in hot air blast for vaporization

Electric Stainless Steel Float ball to replace gravity ball, coupled with a heavy duty solenoid valve to shut off liquid flow automatically

This thermal fogger will out-perform other machines by a wide margin, at the lowest possible operating cost.

Great for uses including:

- Vector Control Programs
- Municipalities
- Mosquito Control Districts
- Large Farming or Agriculture Operations
- Industrial Properties (oil and gas, crop storage, etc)
- Recreation Properties

Optional Steel Frame and 55 Gallon Drum
